Summary

Digital transformation and business process analyst with a Computer Science foundation and consulting experience at PwC South East Asia. Proven track record of delivering workstreams across target operating models (TOM), Salesforce implementation planning, business process reengineering (BPR), and market intelligence. Strong in as-is/to-be process mapping, regulatory compliance (OJK), requirements traceability, and stakeholder workshops. Experienced in presenting strategic recommendations directly to Partners, client leadership, and board members.

Education

Universitas Gadjah Mada

Bachelor of Computer Science (B.C.S), GPA: 3.59/4.00

Thesis: Binary Static Analysis Through Instruction and Operand Extraction and Agglomerative Hierarchical Clustering (AHC)

Yogyakarta, Indonesia

Sep 2020 – Jul 2024

Universität Leipzig

Exchange Semester (DAAD Scholarship)

Leipzig, Germany

Apr 2023 – Sep 2023

Experience

PricewaterhouseCoopers (PwC) South East Asia Consulting

Consulting Intern, Financial Services Strategy & Operations

Jakarta, Indonesia

May 2025 – May 2026

Engagement: Conglomeration Target Operating Model (TOM) — Major SE Asian Banking Group

- Baselined current-state operations across parent bank and 5 subsidiaries/sister companies (including securities, insurance, asset management) to evaluate financial conglomerate (PIKK) structural viability under OJK regulations.
- Mapped end-to-end processes across 40+ SOPs to identify division-level operational synergies (e.g., SME product development) and developed a consolidated, group-wide RACI matrix.
- Developed strategic solutions and board-ready deliverables (BoD, BoC, ExCo) based on peer benchmarking and regulatory research on governance and syndicated loans.

Engagement: Life Insurance Market Intelligence — Multinational Sharia Life Insurer

- Built a regional benchmarking framework using GWP-to-GDP metrics to compare Family Takaful penetration across Southeast Asia, the Middle East, and South Asia across 10+ competitors and 30+ products.
- Consolidated 5 years of competitor financials and macroeconomic trends (2020–2025F) into executive-ready deliverables, securing high client satisfaction and an immediate request for follow-on engagement.
- **Acting PMO Support:** Managed workplans and weekly reporting for a joint 7-member cross-functional team (FS S&O and Actuarial), ensuring seamless deliverable continuity during leadership transition.

Engagement: Enterprise Business Process Reengineering (BPR) — State-Owned Shipping Group

- Led APQC-aligned process mapping for Procurement and QHSSE workstreams; facilitated ~20 stakeholder workshops to identify process bottlenecks, control gaps, and segregation of duties (SoD) opportunities.
- Redesigned 130+ to-be processes, formulated 30+ organizational design recommendations, and defined 100+ Key Performance Indicators (KPIs) to evaluate shared service center (SSC) potential.
- Owned and personally presented procurement and safety process recommendations directly to PwC Partners and Client VPs/Directors to secure strategic buy-in.

Engagement: Sales & Marketing Transformation (Salesforce) — State-Owned Commercial Bank

- Owned technology and data analysis for Salesforce Sales/Marketing Cloud integration with core banking, legacy CRM (CHM), EDM, and knowledge base platforms across 50+ integrations.
- Mapped 100+ target data fields to maintain the Requirements Traceability Matrix (RTM) and co-developed a 3-phase roadmap, ToR, and vendor scoring model.
- Developed the selection framework used by the bank to successfully onboard the chosen System Integrator (SI) and rehire PwC as the implementation PMO.

Business Development & Proposal Design — Financial & Public Sectors

- Contributed to 4 competitive RFPs: a major central bank (CRM Cloud migration), a leading national public hospital (Salesforce CRM), a national ministry of health (Cloud migration), and a national ministry of finance (operating models for tax and state asset directorates).
- Drafted end-to-end proposal components, including competitor benchmarks, pricing/resource models, project methodologies, and executive summaries, collaborating directly with Senior Managers and Directors.

Family Businesses (Agribusiness & Retail)

Business Operations & Analytics (Interim)

Jakarta, Indonesia / Ruteng, NTT / Sumatera Utara

Jul 2024 – Apr 2025

- Established daily Excel tracking for egg production, flock age, and operating costs, identifying profit-dragging areas and potential feed-cost savings to optimize unit economics.
- Conducted expansion feasibility assessments and implemented a web-based harvest tracking dashboard using React to improve operational data visibility.

Naga Cybersecurity

Cybersecurity Intern

Yogyakarta, Indonesia

Aug 2021 – Jan 2022

- Monitored endpoint security alerts utilizing Trellix EDR to support real-time incident triage and analysis.
- Assisted with policy review and documentation of operational security controls using NIST-aligned concepts.
